

## **28<sup>th</sup> Workshop of the Scandinavian Society for Cell Toxicology**

### **First Announcement**

The 28<sup>th</sup> SSCT Workshop will take place in Røros, Norway, 16 - 19 September 2010. Røros is situated about 150 km south of Trondheim and 400 km north of Oslo. Røros is a historical mining town and was included on the list of UNESCO World Heritage sites in 1980. For further information about the venue, see <http://www.visitnorway.com/en/Stories/Norway/Central/Roros>.

The workshop is organized by Tore Syversen from the Norwegian University of Science and Technology (NTNU) at Trondheim (tore.syversen@ntnu.no).

As during previous workshops contributions from all fields of cell toxicology are welcome. Additionally, the SSCT will continue the series of special sessions under the heading "Methods of Cell Toxicology", which, especially, shall attract advanced students and young colleagues who are involved in practical scientific work with in vitro systems.

Students may apply for grants from the SSCT to cover parts of the participation fee for the meeting. Details will be given in the second announcement.

Hasso Seibert  
Chairman of the SSCT
