

Virtual Special Collection: Spotlight on Biobanking

Alternatives to Laboratory Animals

journals.sagepub.com/home/atla

We are currently collating papers for a Virtual Special Collection on biobanking

- Are you working in this field and/or use human-sourced materials in your research?
- Have you developed methods or models based on human material that can be used to replace animals in research?
- Do you want to bring your ideas and research to the attention of a different audience?
- If so, this online VSC is the perfect platform to present your work!

About the journal

ATLA is a peer-reviewed international journal that has been at the forefront of promoting and publishing on all aspects of the development, validation, implementation and use of animal alternatives, for almost 50 years. In addition to the replacement of animals, it also covers work that aims to reduce the number of animals used and refine the *in vivo* experiments that are still carried out (the Three Rs).

More about the online VSC

- Will provide an overview of the current status in the development and application of human tissue-based alternative methods and models.
- Will include a range of in-depth review articles, research papers, and short *Comment* articles.
- Articles will be made available online (subject to access rights) as soon as they are published.
- High visibility on the award-winning SAGE Journals platform, securing a wide international audience, including researchers, policymakers and educators.
- Prompt publishing and no submission or publication fees payable.

Submission process

- Efficient and straightforward submission and peer review process, via the SAGE Track system.
- To discuss the suitability of your paper, please contact the VSC Editor, Rita Seabra, at rita@frame.org.uk
- **Submission deadline: 1st August 2021**
